NATIONAL BIOINFORMATICS INFRASTRUCTURE SWEDEN

SciLifeLab

Introduction to Data Management Practices

NBIS DM Team
data-management@scilifelab.se

https://uppsala.instructure.com/courses/112492

CC BY

Welcome!

Learning outcomes

Take the first steps towards a more systematic and reproducible approach to analysing and managing research data

Feel comfortable enough to start applying some practices and continue learning more

Topics

- Open Science
- FAIR
- Data Organization Practices
- Data Publication
- Metadata
- Cleaning data
- Versioning control
- Data Management Plans

Code of Conduct

All participants are expected to show respect and courtesy to others. All interactions should be professional. In order to foster a positive and professional learning environment we encourage the following kinds of behaviours:

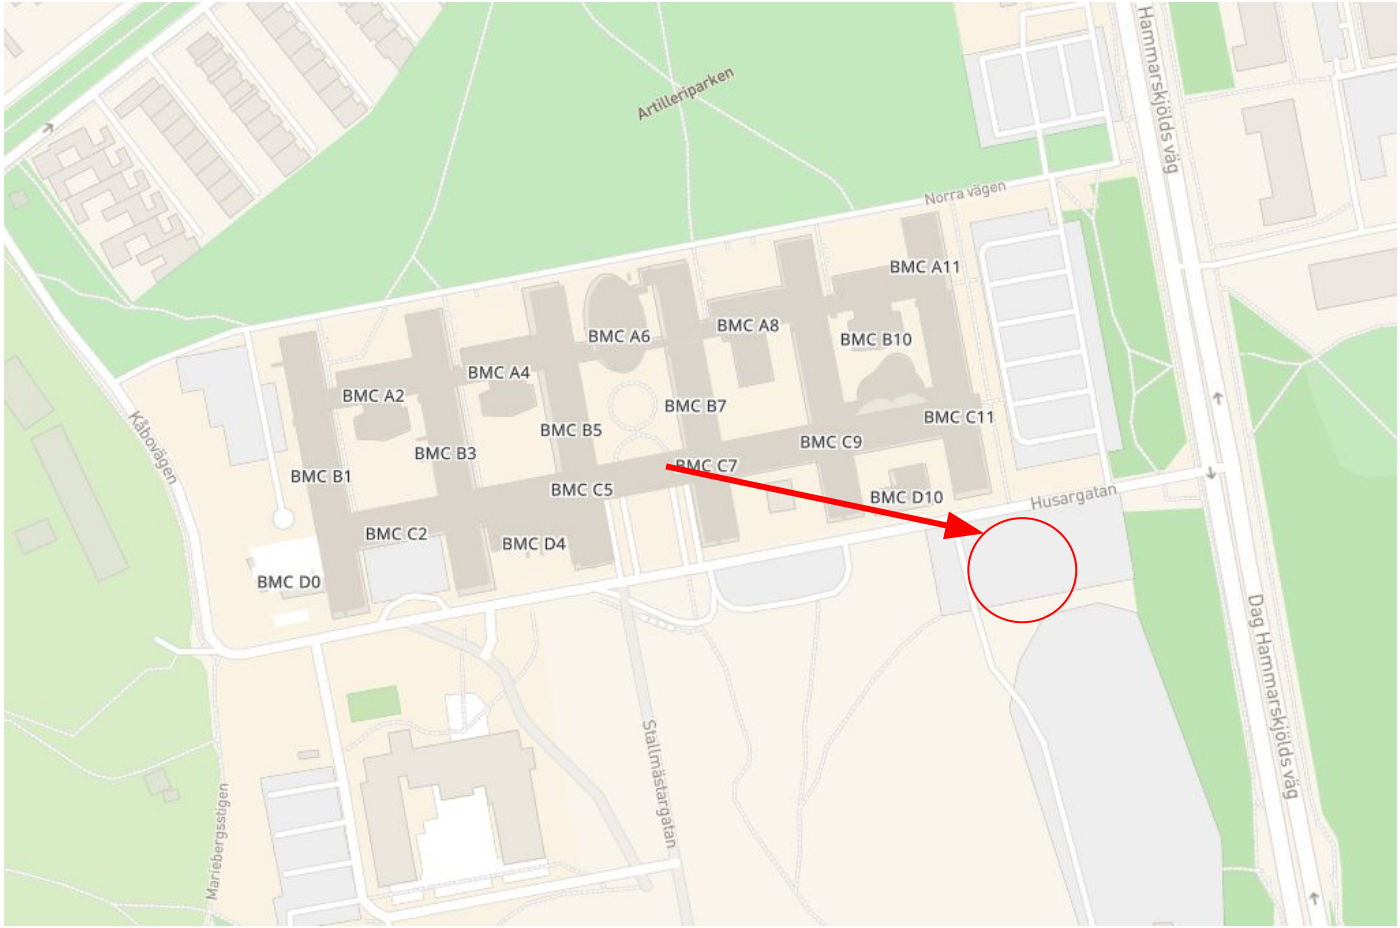
- Use welcoming and inclusive language
- Be respectful of different viewpoints and experiences
- Gracefully accept constructive criticism
- Focus on what is best to all those involved in this training event
- Show courtesy and respect towards everyone involved in this training event

For more information on the NBIS Training Code of Conduct please see https://uppsala.instructure.com/courses/48087/pages/nbis-training-code-of-conduct

Practicalities

- Trainer - Helpers
- Getting attention
  - Green & Orange sticky notes
- Canvas
- Collaborative notes
  - Rolling course notes
- In case of fire
  - Assembly point outside of the building
- Contact channels
  - Emergency email - edu.intro-dm@nbis.se
  - +46 767969914 (Richelle)
- Software - let us know if you still need help!
- Time at the end to apply what you have learned on your own work
- End of course
  - Evaluation form

Assembly point



NBIS: The SciLifeLab bioinformatics platform

~120 staff at six different sites across Sweden with expertise in many different omics-related areas

Analysis of biological data

Support – Infrastructure – Training

NBIS Data Management Team

NATIONAL BIOINFORMATICS INFRASTRUCTURE SWEDEN

SciLifeLab

Team vision

"Swedish Life Science researchers **apply good Data Management practices** so that the **research outputs** produced are **available** to the global research community, and to society at large, according to the principles of *Open Science*, *Reproducible Research*, and *FAIR*"

Team mission – **Support** – **Training** – **Collaboration**

ELIXIR Europe

ELIXIR is an intergovernmental organisation that brings together life science resources such as

- databases
- software tools
- training materials
- interoperability resources
- compute resources
- data management support

The goal of ELIXIR is to **coordinate bioinformatics resources from across Europe so they form a single infrastructure**.
